

INTUBATIEM

CARDIOVASCULAR EMERGENCIES

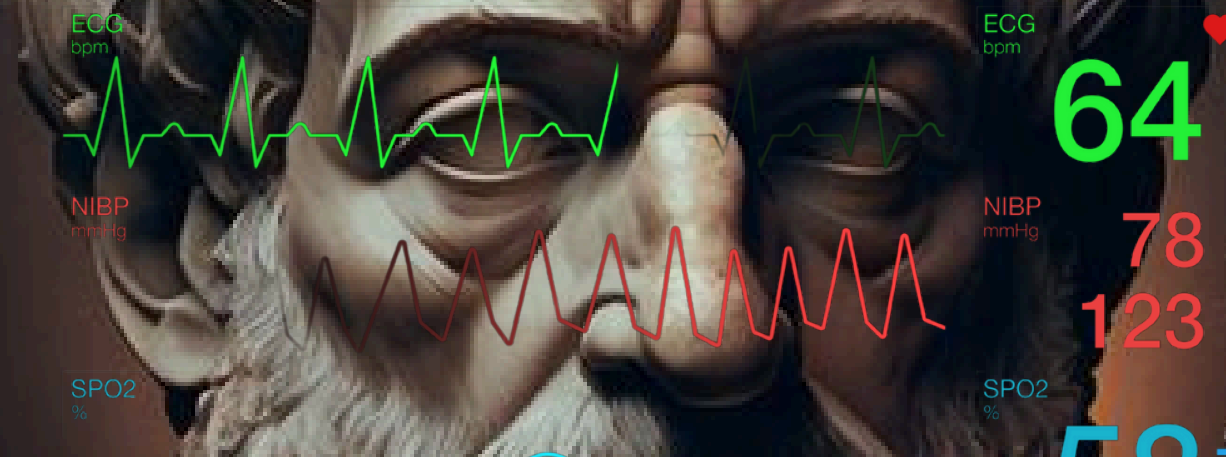

The first course dedicated to the
BEYOND
ACLS®
**NOT JUST A ROUTINE
OF RESUSCITATION**

13-14th March 2025

LODI

info@intubati.net

www.intubatiem.org

PROGRAM

0800 Registration
 0830 Open Course

ECOALS
1000 - 1100

1100 - 1130 Coffe Break

Integrated Ultrasound Approach in Cardiac Arrest

BEYOND THE PROTOCOL
0900 - 1000

PEA and pseudo-PEA: using ECO

ACC: a reasoned treatment

RESUSCITATIVE TEE
 TRANSESOPHAGEAL ECHOCARDIOGRAPHY (TEE/TOE) in Critically-ill patients in any acute care setting

Cardiogenic shock: a difficult enemy

Massive Pulmonary Embolism: Identifying the Hidden Killer

Beyond 5I e 5T: 5 C & and Hypoglycemia

Cardiogenic Pulmonary Edema: A Modern Approach

DSED - Double Sequential Defibrillation: Strategies for Refractory Ventricular Defibrillation

Cardiac Tamponade

DRUGS in Cardiac Arrest: use your EPI like a sniper and change PLAN

13
MARCH
MORNING

WHEN THE ECG IS NOT DIAGNOSTIC

1330 - 1430

The ACS Unmasking
The STEMI Equivalents

ARRHYTHMIAS

Diagnosis and Treatment of Tachycardia:
When QRS Length Doesn't Matter

Diagnosis and Treatment of Bradycardia:
Not Only Atropine and Pacing

**SPEAR & REBOA
THE NEW FRONTIERS OF ACC
1430 - 1530**

The "SPEAR" Algorithm
SPECIALIST PERCUTANEOUS
ENDOVASCULAR AORTIC
RESUSCITATION

**REBOA
ERICA - ARREST**

Emergency Resuscitative
Endovascular Balloon Occlusion of
the Aorta in Out-of-Hospital
Cardiac Arrest

**13
MARCH
AFTERNOON**

STATION 1

LOW FIDELITY SIM

Story of a perfect resuscitation.

TRAINING e TEAM WORKING

STATION 2

MECHANICAL VENTILATION

HAEMODYNAMIC DURING MECHANICAL CPR to use or not to use?

STATION 3

ECOALS

POCUS

guiding resuscitation

STATION 4

AIRWAY MANAGEMENT

Airway Management during during Peri & Cardiac Arrest

WORKSHOPS

1130 - 1330

1530 - 1830

STATION 5

SPEAR & REBOARREST

Specialist Percutaneous Emergency Aortic Resuscitation

STATION 6

VASCULAR ACCESS

POCUS guided Vascular Access in Cardiac Arrest

STATION 7

TEE RESUSCITATIVE

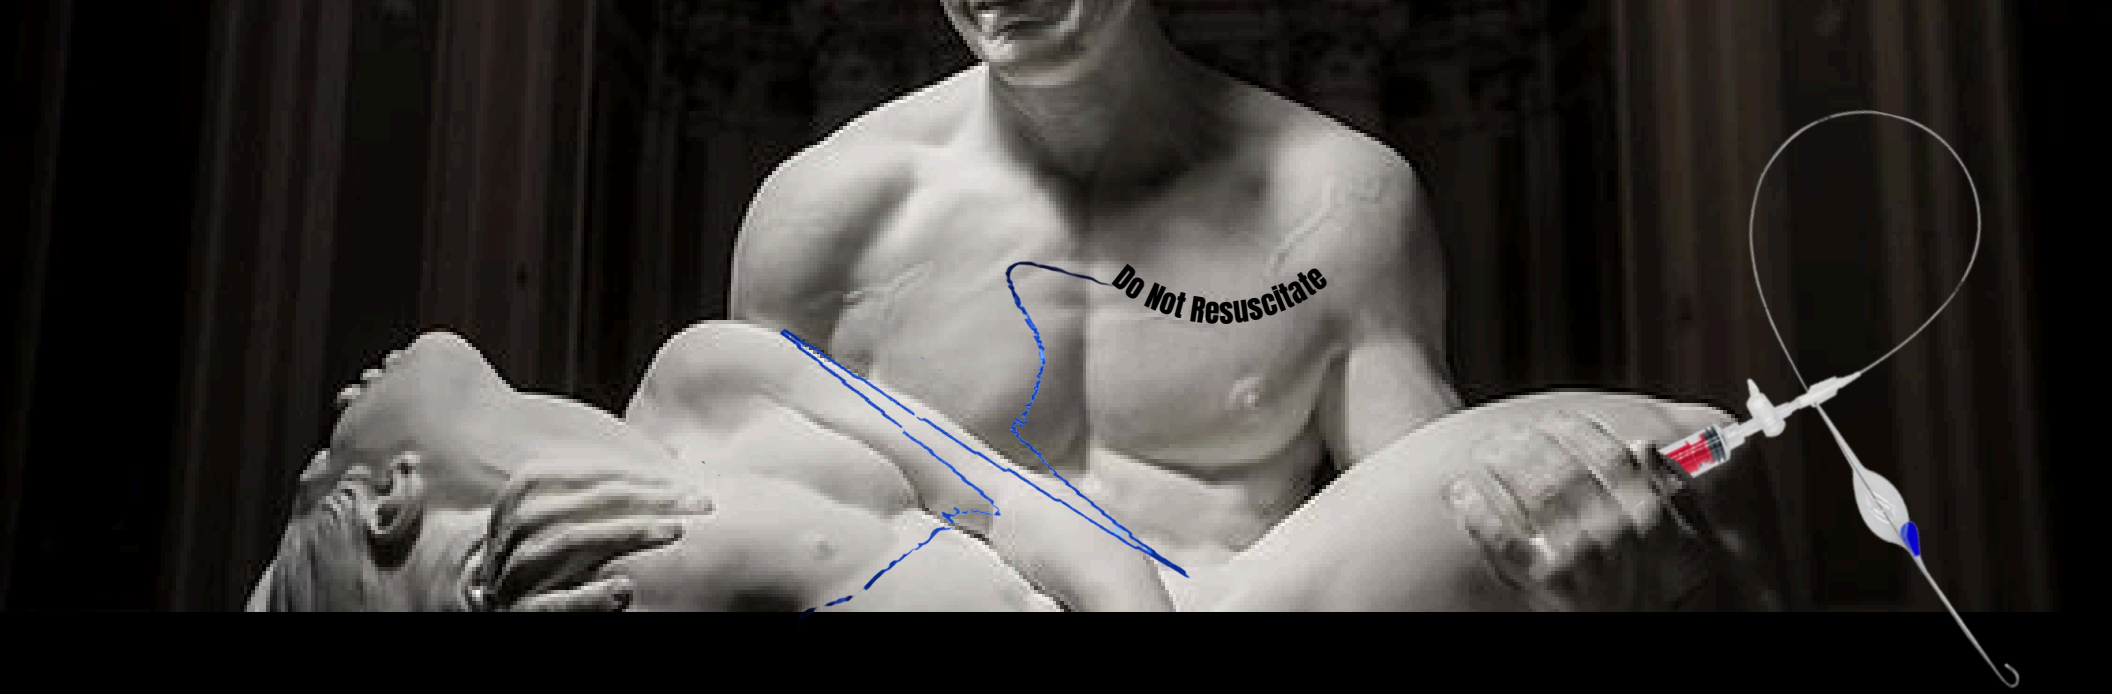

Resuscitative Transesophageal Echocardiography

STATION 8

RESUS HYSTEROTOMY

Peri-mortem Caesarian Section Training

**13
MARCH**

SIM WARS

0900 - 0930 BRIEFING SIMULATION

0930 - 1300

Simulations in TEAM, INTRA and Extra-hospital settings

1300 - 1400 Lunch

1400 - 1600

Simulations in TEAM, INTRA and Extra-hospital settings

1600 - 1700

FINAL WAR

1730 END COURSE

A **SIM DAY** where participants, divided into TEAMS, will be able to take part in high-fidelity simulations in an Intra and Extra-hospital setting.

EDUCATIONAL OBJECTIVES

BEYOND ACLS is a course designed for healthcare professionals who want to go beyond the standard ACLS guidelines and delve deeper into the management of cardiac arrest in a more advanced and effective way. The ACLS guidelines provided by the American Heart Association are essential to establishing a foundation of knowledge and skills in the management of cardiac arrest, but may not be sufficient for professionals who are seeking to achieve better and safer outcomes for their patients. The BEYOND ACLS course is based on up-to-date scientific evidence and provides participants with access to new findings and best practices in the field of adult cardiac arrest management. Course instructors are experts in the field and provide advanced and in-depth skills to manage complex and critical situations effectively.

By participating in the BEYOND ACLS course, healthcare professionals can gain a greater understanding of the causes of cardiac arrest, the most current intervention strategies, and advanced procedures to optimize patient management. This allows them to be better prepared to deal with emergency situations and improve the clinical outcomes of their patients.

In conclusion, BEYOND ACLS provides healthcare professionals with the tools and knowledge necessary to manage cardiac arrest in an advanced and effective way, going beyond the standard ACLS guidelines and ensuring a better quality of care for patients.
